**Odile SONNEVILLE-AUBRUN** is Head of Skincare & Make-up Physical-Chemistry laboratory at L'Oréal (Chevilly-Larue Research Center - France).

Dr. Odile Sonnevillle-Aubrun was graduated from ESPCI (Ecole Supérieure de Physique et de Chimie Industrielle de la ville de Paris) in 1993. She obtained a Post-Master degree specialization in Soft Matter from Sorbonne University in 1994 and her PhD in Physical-Chemistry on biliquid foams from Sorbonne University in 1997. She has been working for L'Oréal Research for 20 years in the field of skincare, body hygiene and make-up products innovation. Many of these innovations have been patented.

Since 2016, she has joined L'Oréal College of Experts and has contributed to internal trainings in Physical-Chemistry applied to cosmetics.

Her main research is focused on deep understanding of structure and properties of products from bulk to deposit on skin and hair and on formulation triggers exploration to deliver new products with high measured and perceived performance. This knowledge of applied Physical-chemistry makes it possible to identify and understand the major breakthrough innovations launched by L'Oréal.
