**Marc EEMAN** holds a PhD degree in Agricultural Sciences and Biological Engineering from Gembloux Agricultural University in Belgium. In 2008, he joined StratiCELL, a Belgian service provider specialized in the in vitro reconstitution of skin equivalents. In 2010, he joined Dow Corning in Seneffe (Belgium) as a Skin Care Application Designer.

Dow Corning is now a wholly-owned subsidiary of The Dow Chemical Company (NYSE: DOW). As Skin Care Application Designer Marc contributed to the development of new testing methods for characterizing the performances of polymeric technologies for skin care applications and worked on R&D projects aiming at studying the skin penetration of cosmetic actives. In parallel, Marc has been involved in the development of silicone-based strategies to protect skin against environmental pollution. He is now coordinating the CITYCARE project, a European project under Horizon 2020, to further study the impact of pollution on skin.
